

Simulated read set assembly results

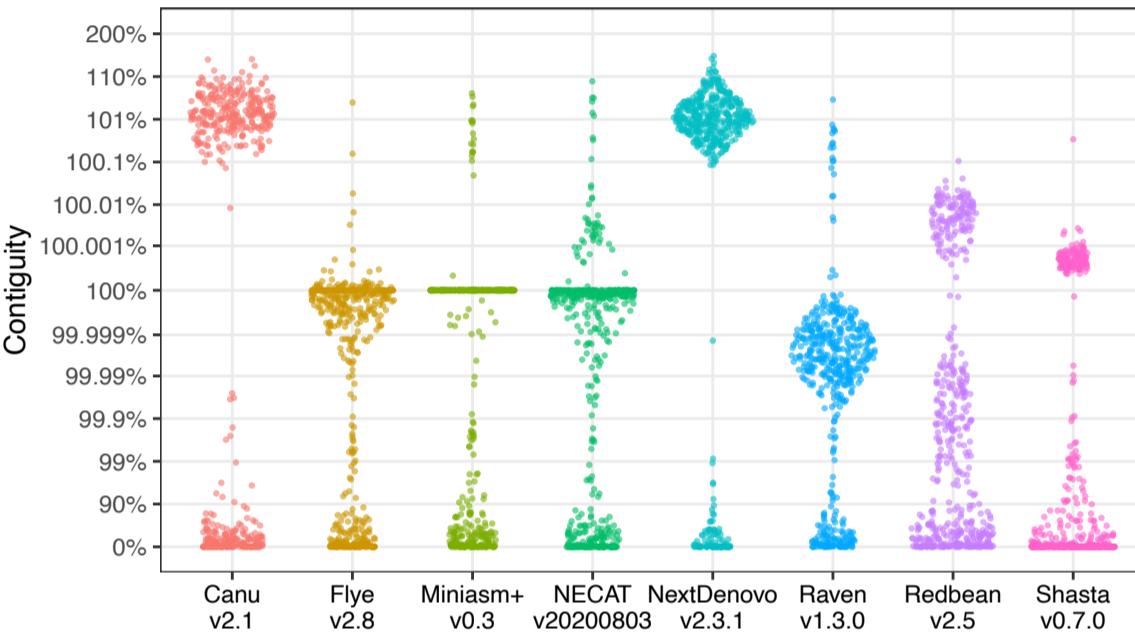

A. Assembly status

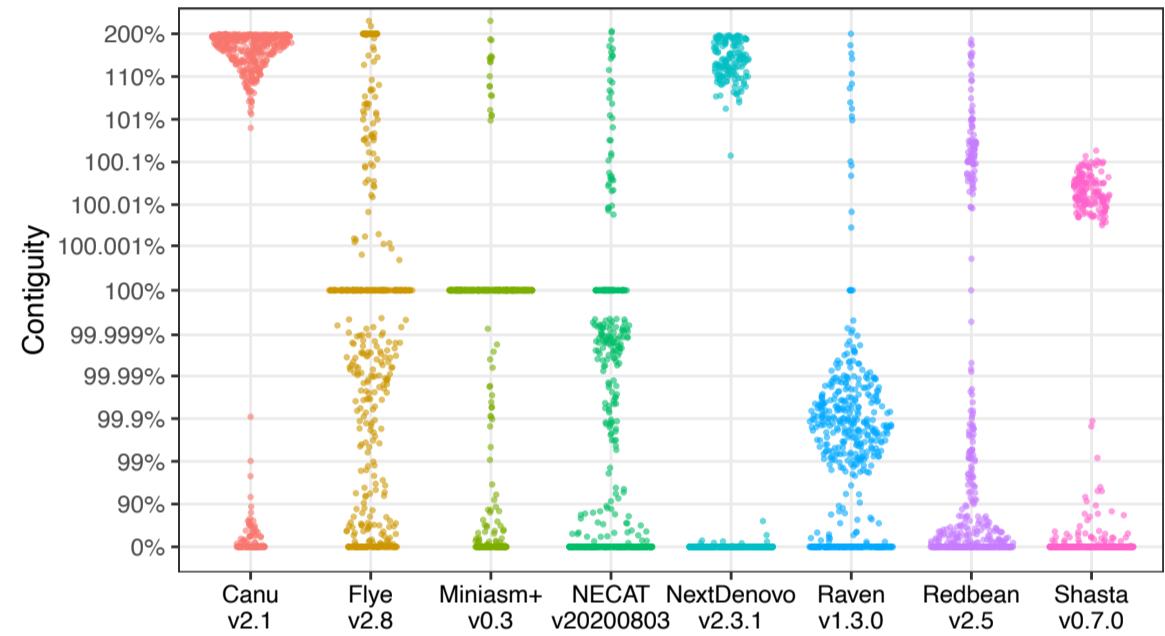

Legend:

- empty:** assembler did not produce any sequence
- incomplete:** assembly had <99% chromosome contiguity
- complete chromosome:** assembly had >99% chromosome contiguity but plasmids at <99% contiguity
- fully complete:** assembly had all replicons at >99% contiguity

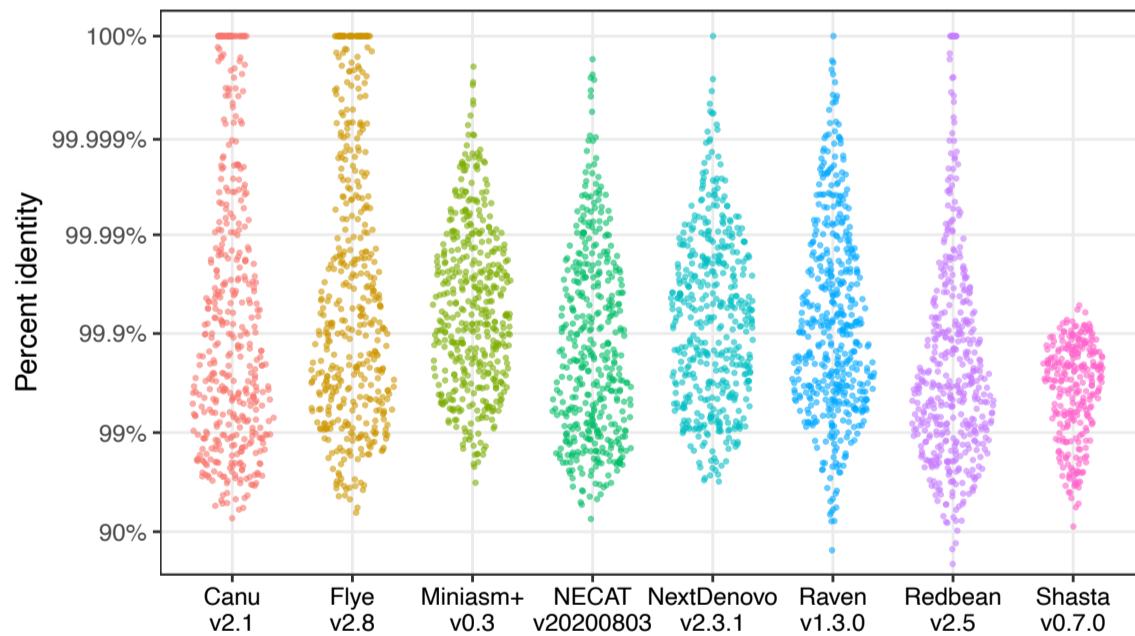

B. Chromosome contiguity

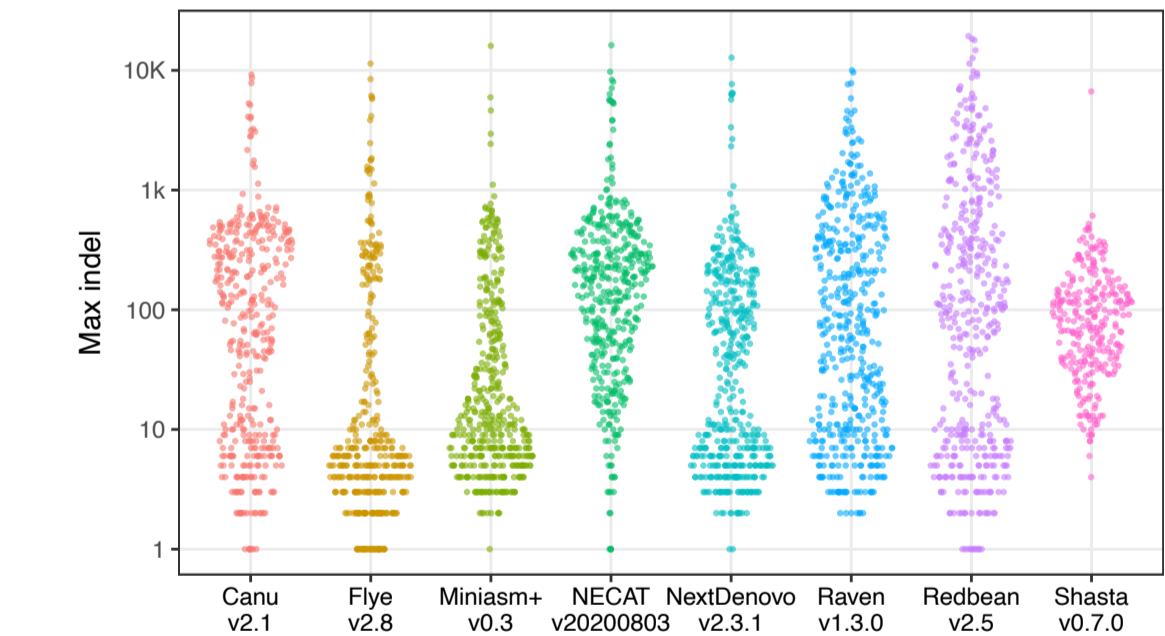

C. Plasmid contiguity

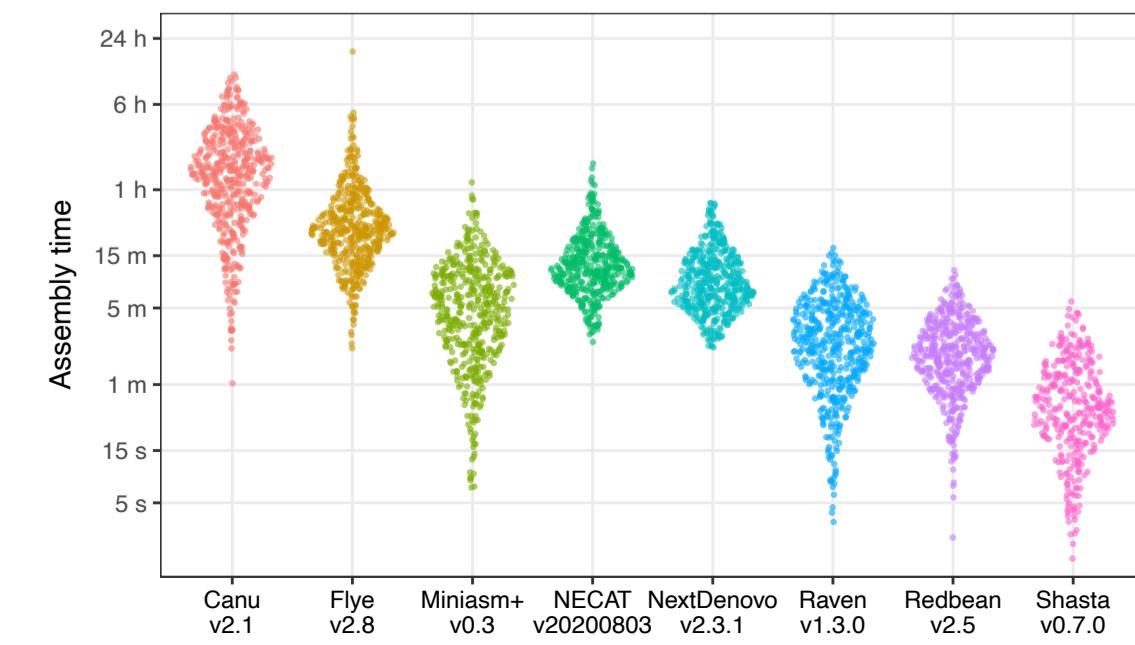

D. Chromosome identity

E. Chromosome max indel

F. Runtime

G. RAM usage
