

Simulated read set assembly results

A. Assembly status

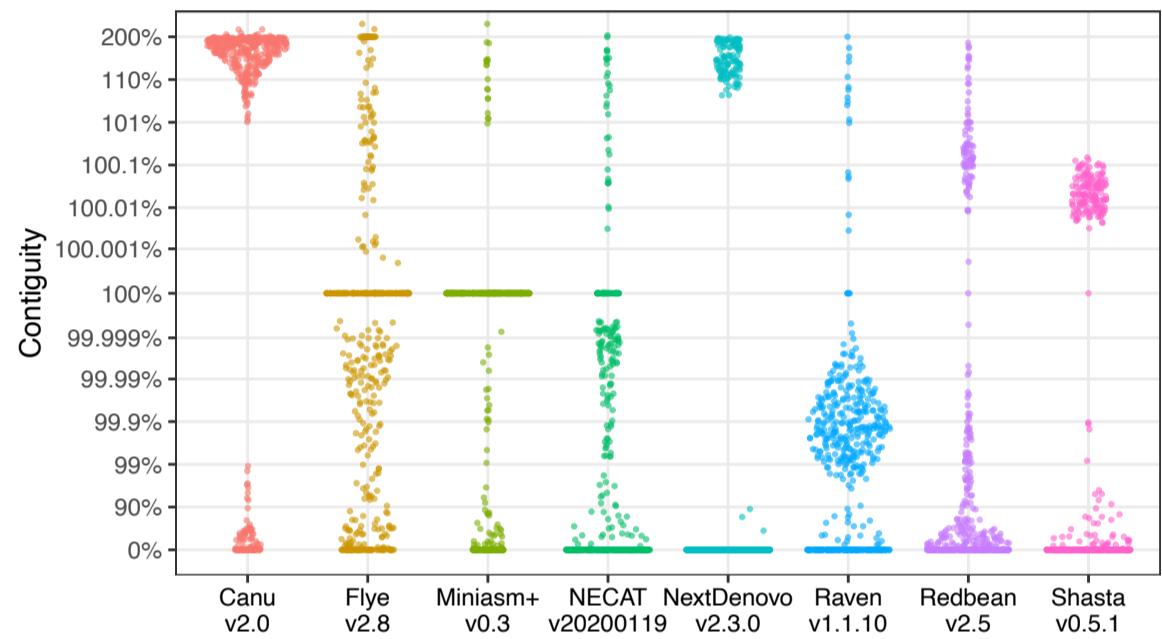

empty: assembler did not produce any sequence
incomplete: assembly had <99% chromosome contiguity
complete chromosome: assembly had >99% chromosome contiguity but plasmids at <99% contiguity
fully complete: assembly had all replicons at >99% contiguity

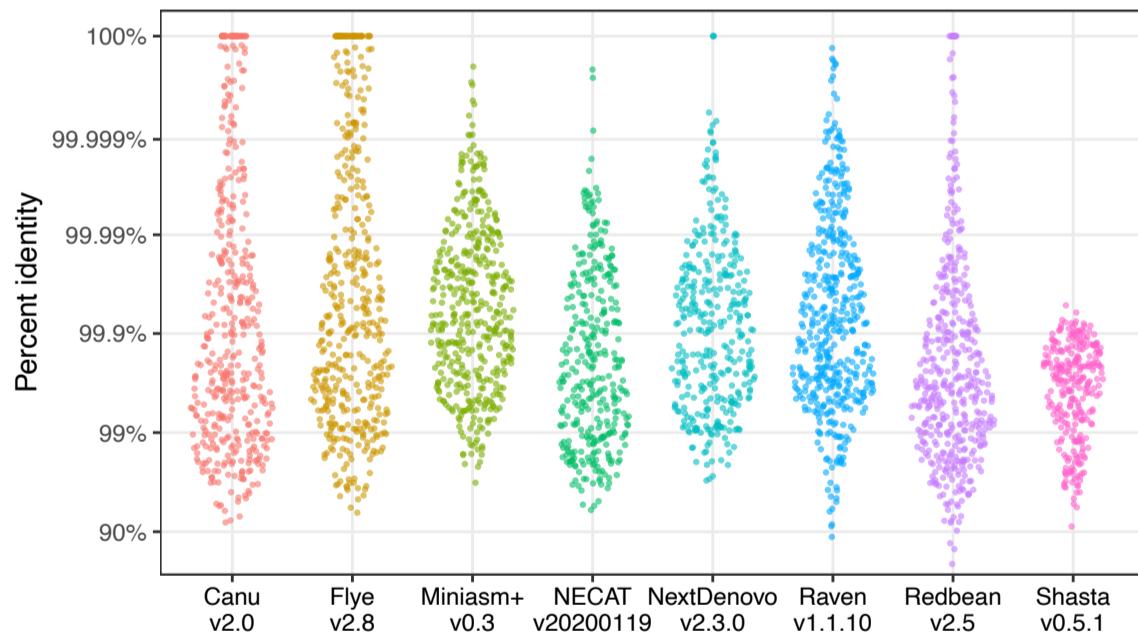

B. Chromosome contiguity

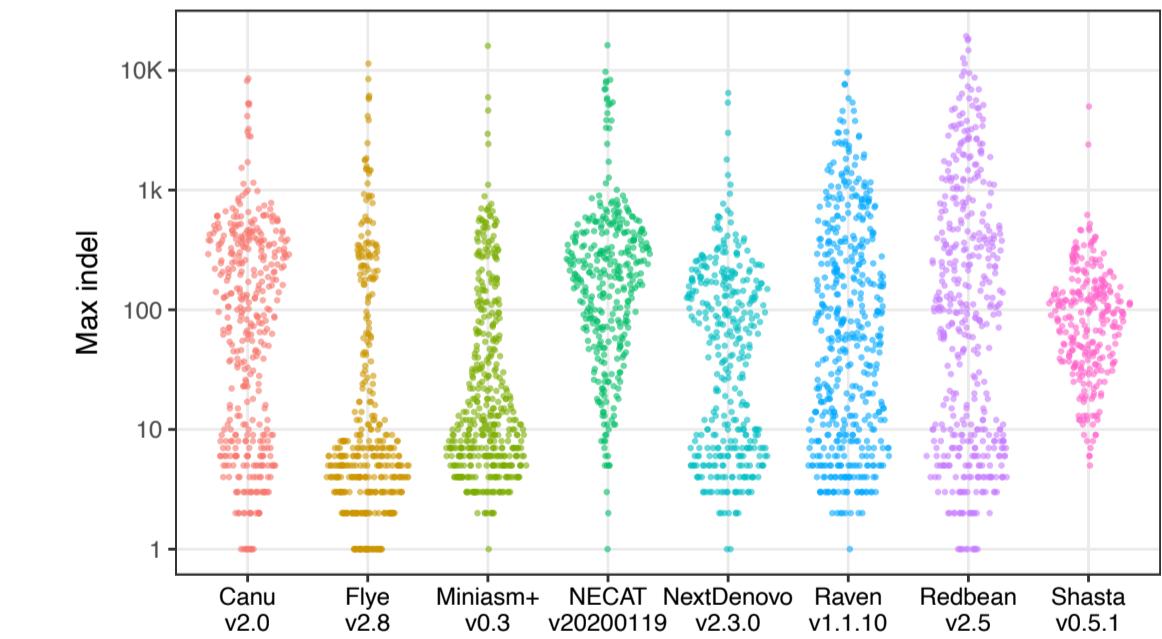

C. Plasmid contiguity

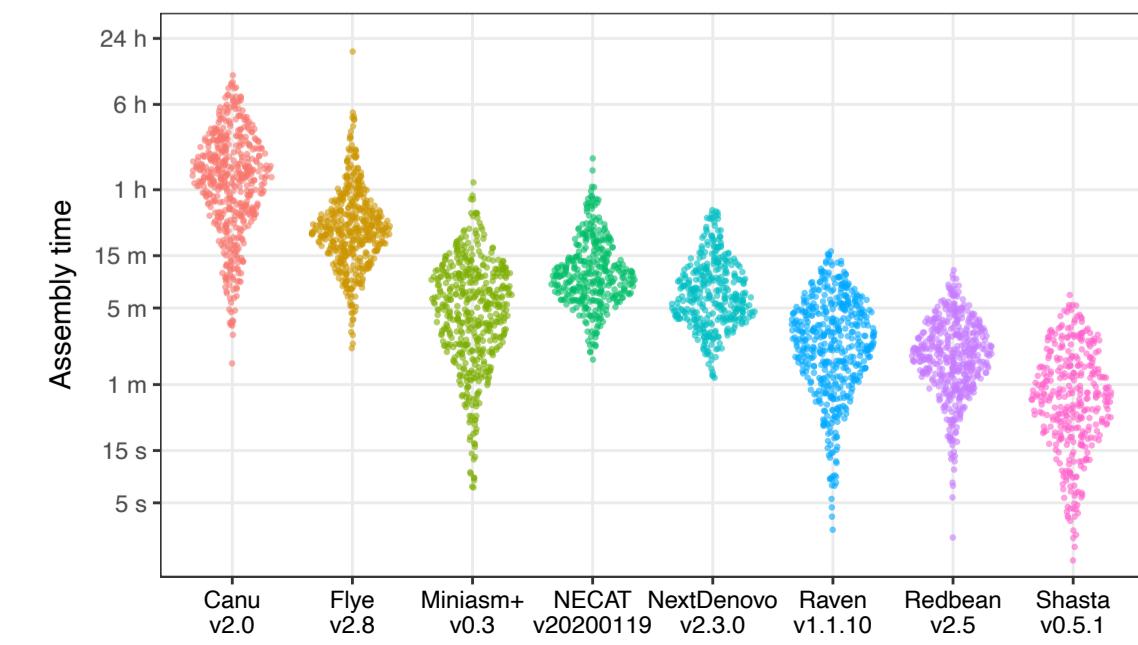

D. Chromosome identity

E. Chromosome max indel

F. Runtime

G. RAM usage
